Profile

I have 10 years of experience in mobile development, building frameworks with CLEAN architectures and complete unit testing coverage. I have lead projects with junior developers from planning to deployment and setup Continuous Integration and Continuous Distribution pipelines from scratch.

I am living in Neuss, Germany on Job Seeking VISA and available to start working immediately.

Employment History

Senior iOS Developer, Zeta Global

Jan 2024 — Jul 2025   ⌖ Bangalore

- Building Analytics Framework ZetaKit
- I have built an Analytics SDK based on **CLEAN architecture and unit testable** code. I have used protocol oriented programming to help mock all the dependencies ensuring high quality unit tests
- I have setup unit test to be run on **CI Pipeline using xcodebuild CLI**, this ensures minimum code coverage is maintained
- I have introduced process of writing Technical Requirement Documents before big features to align all developers on the contract, approaches used in development.
- I am **mentoring one developer** guiding him with help on architecture, code quality.

Senior iOS Developer, Gojek

Mar 2019 — Jul 2023   ⌖ Bangalore

- Worked on Gojek App
- I had built the core framework for chat which is responsible for driving customer and driver interactions, I had used starscream framework to establish **socket connection** for **real-time chat**
  - Chat SDK resulted in saving **3 Million dollars per year**
- Chat also powers our **Chat Bot** that helps in **resolving customer issues** by providing automated solutions to their queries.
  - Chat Bot resulted in automating 30% of support queries
- I have implemented caching of Chats to improve reliability and low network UX using **GRDB** Caching
- I have learned Golang, microservices, aerospike and paired on building Counting **microservice** which is being used to **pace advertisements**.
- Setup **mobile alerts and monitoring** for our SDK, this helped us observe inner working of our SDK as well as setup alerts in case of increase in errors
- I have lead multiple project's **mentoring junior Android and iOS developers** along the way. I have worked **closely with product managers to plan out initiatives** that we take up in our half yearly

Socket Communications

iOS Developer, PwC

Jun 2016 — Nov 2018   ○ Dubai

- I worked with multiple Clients in Dubai real estate to build a mobile solutions for there sales consultant, which helped them track and create new customers and book properties online.
- Migrated parse server for our client DMCC to a open sourced parse server

iOS Developer, Stayzilla

Jun 2014 — Jun 2015   ○ Bangalore

- In Stayzilla, I was part of founding application team, developing the iOS application from scratch. The application was meant to be used as hotel booking as well hosting your home space for customers.
- I helped build multiple modules like propery listing and payments module

Education

PDPM IIITDM, B.Tech Computer Science

Jul 2010 — Jun 2014   ○ Jabalpur
